 Construction!**

2015 ExtraOrdinary Technology Conference Overview

Albuquerque Embassy Suites • Albuquerque, NM • July 29 - August 2, 2015

TeslaTech, Inc reserves the right to make changes to this schedule without notice.

Wednesday • July 29

Session 1 (Evening) • An ExtraOrdinary Revelation

5:00PM: **Thomas Valone PhD** - V-Track Spiral Magnet Motor Development

7:00PM: *Conference Evening Social*

Thursday • July 30

Session 2 (Morning) • ExtraOrdinary Health Issues

8:00AM: **Charles Crosby DO, MD(H)** - Revolutionary Cams Technology

9:30AM: **Janna Mintz** - BEMER Physical Vascular Technology

11:00AM: **Edward Kondrot, MD...** - Saving your Eyesight with FSM Treatments!

Session 3 (Afternoon) • ExtraOrdinary Magnetic Technology

1:00PM: **Thorsten Ludwig, PhD** - Overunity Test on a Kromrey Generator, ZPE and Magnetism

2:30PM: **Russell Anderson** - Free Energy, Magnetic Converters and Antigravity

4:00PM: **Dannel Roberts** - Magnets and the Torus Structure

Session 4 (Evening)

7:00PM: **David Puchta** - The Linear Magneto Effect

8:30PM: *Conference Evening Social*

Friday • July 31

Session 5 (Morning) • ExtraOrdinary Health Devices

8:00AM: **Josh Silver** - Modern Use of High Power PEMF Therapy and its Scientific Basis

9:30AM: **Aeron Goldheart** - Tesla's Humanitarian Wireless Technology Helps Relieve PTSD

11:00AM: **Wil Spencer** - Galvanic Skin Response (GSR) Hand Scanner

Session 6 (Afternoon) • ExtraOrdinary HHO Technology

1:00PM: **Max Miller** - Stan Meyer Unveiled! Convert Water to Fuel

2:30PM: **Moray King** - Vibrating Water Electrolyzers

4:00PM: **Andrew Batty** - Engineering Modern HHO Technology With Quantum Physics

Session 7 (Evening)

7:00PM: **Nikolaos Simos, PhD** - A Classical Approach to Tesla's Wireless Energy

8:30PM: *Conference Evening Social*

Saturday • August 1

Session 8 (Morning) • ExtraOrdinary Concepts...

8:00AM: **Michelle Murphy** - Cold Fusion vs. Thorium as an Alternative to Nuclear Power Plants

9:30AM: **Slobodan Nedić** - Thermo-Gravitational Oscillator

11:00AM: **Bill Alek** - An Introduction to FREE Energy and Overunity Technology

Session 9 (Afternoon) • Real Alternatives in Energy Technology

1:00PM: **Vendors** - Vendor Showcase

2:30PM: **Harvey Fiala** - A Patented Inertial Propulsion Device

4:00PM: **Mike Gamble** - State Of The Art Inertial Propulsion Engineering

Session 10 (Evening)

7:00PM: **Paul Potter** - Domed Spacecraft Propulsion Dynamics

8:30PM: *Conference Evening Social*

Sunday • August 2

Session 11 (Morning) • ExtraOrdinary Challenges

8:00AM: - **Michael Twichell** - Aether Physics

9:30AM: **Dr. John Rahart** - Bringing the Ethers Home... Practical Apps & Devices

11:00AM: **Suzanne Price** - ZPE: Quantum Threshold of Future Science

Pre Conference Workshop
Not included in Conference Fees

Wednesday Afternoon

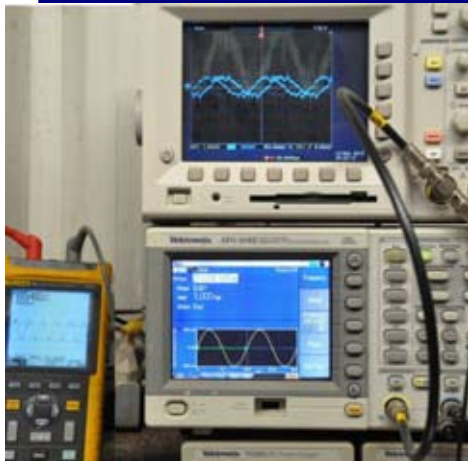

July 29 -- 1PM

Radiant Energy Harvest

John Fiala

**DVDs Will Be
AVAILABLE AFTER
CONFERENCE!**

Wednesday Workshop · July 29 · 1PM

Radiant Energy Harvest

John Fiala

Identification and farming/harvesting techniques of natural ambient electromagnetic radiation (EMR)!

Although there are numerous bands of electromagnetic radiation (EMR) available in our environment, how many have considered farming or harvesting the energy in these fields? This three (3) hour workshop will help you gain the necessary understanding to perform your own EM survey, and to build/assemble the right equipment for harvesting these energy fields.

While this workshop will focus on a few techniques to survey the strength of these fields, economical techniques using off-the-shelf hardware for harvesting the energy in those fields will be evaluated, including *microharvest-*

ing and even *nanoharvesting* energy fields. A brief review of available off-the-shelf hardware and software will be presented as well as techniques for fabricating your own sensory/detection apparatus to work with your own existing laboratory equipment. Sources of equipment necessary to complete your own electromagnetic field (EMF) survey will be explored.

Finally, the basic requirements for *off-grid* power management will be examined so that you know how to begin to take credit on your electric bill for the energy that you are now going to be capable of harvesting!

Conference Lodging Facilities

Limited space...
Please register by June 30!

Albuquerque Embassy Suites Hotel & Spa

1000 Woodward Place NE
Albuquerque, NM 87102

Conference rates!**

\$94⁰⁰ per night!!

Special rate guarantee expires June 30!!!

Conference Evening Social

Meet the Speakers
... and New Friends!

Wed/Thu/Fri/Sat
~8:30PM

Every night provides an opportunity to meet the speakers and other attendees in a relaxed social setting. It's a great opportunity to make new friends that share your interests. We even provide some refreshments!

Hotel Amenities

Special hotel amenities for conference attendees include:

- Free Breakfast
 - Complimentary Drinks
 - Free high speed internet
 - Free local calls
 - Clean, fresh, two room suites
- All suites equipped with two 27-inch televisions, a refrigerator, microwave oven, coffee maker, iron, ironing board, hairdryer, two telephones and a dining/work table.

For taxicab service in Albuquerque,
Call **Albuquerque Cab Company** at

Crosby Advanced Medical Systems (CAMS)

Relieve Pain and Inflammation; Stimulate Regeneration

13556 Dornoch Dr. Ste #1
Orlando, FL 32828
Phone: (407) 823-9502
Fax: (407) 823-9427

www.tenscam.com

Visit booth #

When balanced, the human body is capable of regeneration and self-healing. Crosby Advanced Medical Systems (CAMS) provides non-invasive technology that naturally balances the human energetic field. CAMS devices use solid state quartz technology and the resonant frequency of the Earth to incorporate healing resonances in scalar output.

Naturally relieve pain and inflammation; support telomere re-growth; release emotional trauma—without drugs, needles or surgery.

Seventh International Conference on Future Energy

Integrity Research Institute • www.integrityresearchinstitute.org

Integrity Research Institute (IRI), sponsor of COFE7, is collaborating with TeslaTech to present a three-day conference with peer-reviewed published proceedings on July 30, 31, and Aug. 1, 2015. Original papers in energy, propulsion, and bioenergetics are invited in order to help IRI fulfil its mission statement.

Integrity Research Institute is a non-profit 501(c)3 charitable institution dedicated to educating the public on new clean energy technologies and to help establish research integrity in all of the energy sciences. It is committed to the revitalizing work of securing our future by investigating, documenting and hosting conferences on emerging energy technology that is eco-sustaining, breakthroughs in new forms of propulsion and revitalizing discoveries in bioenergetics

Roy Davis (Qualcomm-Wireless Power w/HiQ Resonator)
Robert Smith (Getting Millions for Inventors)
Mike Gamble (Boeing inertial propulsion engineer)
Dr. Nick Simos (Brookhaven Ntl Lab - wireless energy)
Dr. Thomas Valone (V-Track Spiral Magnetic Motor)
Dr. Thorsten Ludwig (quantum vacuum experiment)
Rober DeBiase (Asymmetric Casimir Plates Experiments)
Paul Potter (Domed Craft theory and engineering)
Frank Znidarsic (Quantum Condition and Elastic Limit)
Dr. Bev Rubik (self-org in aqueous membrane interfaces)
Carlos Hendriques (ZPE Master's Degree presentation)
Marcus Reid (new energy technologies)
Dr. John Milewski (zero point energy)
William Alek (Antigravity revealing technology)
... presenters on ENERGY, PROPULSION, & BIOENERGETICS!

Tentative Program located at
www.futureenergy.org

Attendees of the TeslaTech Conference will be able to attend the COFE7 lectures at no additional charge.

Conference Evening Sessions ...

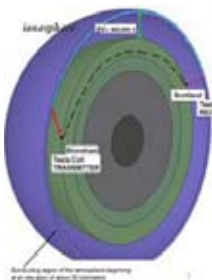

Wednesday Jul 29 -5PM V-Track Spiral Magnet Motor Development

Thomas Valone, PhD

The original Spiral Magnetic Motor was an energy milestone by Kure Tekkosho in the 1970's with great potential!

An energy milestone by Kure Tekkosho in the 1970's, the Spiral Magnetic Motor can accelerate a magnetized rotor through 90% of its cycle with only permanent magnets. However, the Japanese company used old ferrite magnets with a weak coercive force and an additional electric coil defeating the purpose of the motor design. Therefore, its Magnetic Wankel was not a successful attempt at a self-powered motor. The principle behind the motor is a magnetic gradient analogous to gravity where a steeper hill provides higher speeds for vehicles going downhill.

The radial magnetic field increases then decreases in strength as the rotor turns thru one cycle. Electromagnetic switching has been used to help the rotor traverse the gap between the beginning and end of the magnetic stator arc. Alternative magnetic pulse and switching designs have been developed, as well as strategic eddy current creation. This work focuses on the switching mechanism, novel magnetic pulse methods and advantageous angular momentum improvements.

Friday Jul 31 - 7PM A Classical Approach to Tesla's Wireless Energy

Nikolaos Simos, PhD

Classical Physics Assessment of Tesla's WorldWide Wireless Energy System

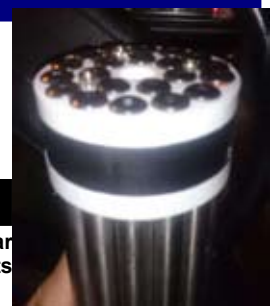

This presentation is based on what we understand as classical, mainstream physics. Its aim is to steer clear from convoluted concepts which, after have hurt rather than helped Nikola Tesla's scientific contributions and reputation. On the basis of the fundamental laws that describe (or as best as we think we understand them) electromagnetic, resonance and other physical phenomena, this presentation examines Tesla's **WorldWide Wireless Energy System** and attempts to qualify questions such as:

- Are certain far-reaching Tesla's assertions/experimental observations contained within the fundamental laws or do they violate them?
- Is there an explanation of the observations, based on classical physics, and how our scrutiny of the "accepted" governing laws may have helped reveal hidden connections to Tesla's claims?
- Are we finally connecting the dots between Tesla's thoughts and the great potential they may carry so as to benefit society as a whole?

Thursday Jul 30 - 7PM The Linear Magneto Effect

David Puchta

Biofuel from water, algae and scalar waves is just one of the byproducts of this exciting new technology!

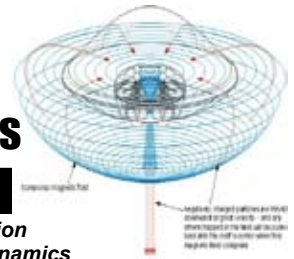

A study of bouncing electromagnetic forces off of a crystal-line structure and measuring the response energy revealed an anomaly referred to as the **Linear Magneto Effect**. Amplification of the anomaly has resulted in a solid foundation of understanding of a new energy platform that washes the anomalies found from Cold fusion to Stan Meyers into the history books. Extensive validated lab time, has been devoted to studying the effects and using this new form of energy now designated as **Linear Paul Magnetizum**... using the spelling change in 'magnetic' to denote gravitational wave.

Linear Paul Magnetizum is used in the HydroMe Truefuel cell to create BlewMe Fuel. BlewMe is organically grown from saltwater to grow a high lipid oil algae on demand and to change the frequency chain to grow elements isolated from each other. These are effects of cold fusion and pulse electrolysis already. What this researcher has done is to turn on the 'off time' all the time. A working cell and other hardware will be at the conference!

Saturday Aug 1 - 7PM Domed Spacecraft Propulsion Dynamics

Paul Potter

The author of *Gravitational Manipulation of Domed Craft: UFO Propulsion Dynamics*

For the first time before a public audience, Paul will briefly recount a few highlights of his experience with domed craft. It will include a summary of the proposed physical concepts that are essential for a domed craft to operate in extraordinary ways. Through consultation with physicists, engineers, and Betty Luca's testimony, Potter refined the detailed and dynamic graphic images in his book to come up with a conceptual model for propulsion based on fluid dynamics.

The electromagnetic process outlined is not one wholly familiar as it manipulates a graduated spectrum of electromagnetic power—governed by a graduated strength of the coupling parameter alpha. This graduated spectrum influences all matter, energy potency, and time—it even governs that elusive branch of electromagnetic interactions known as gravitational force. In order to conquer the final frontier, space might better be regarded as having dynamics which undergo a process, and that what we have conjectured, thus far, about space, is merely from our observations of it as it slumbers in the neutral state of that dynamic process.

Saving your Eyesight with FSM Treatments!

Edward Kondrot, MD...

The roots of Frequency Specific Microcurrent (FSM) date back to the early 1900's from Dr. Albert Abrams, who was the first physician to use calibrated instruments capable of detecting the radiations of living tissue. Dr. Abrams concluded that all matter radiates electromagnetic energy and the characteristics of the radiation depends upon the unique molecular structure. Modern FSM utilizes hundreds of frequencies with varying intensities.

Every tissue in the body has an individualized frequency... and each pathology has a frequency (ie hemorrhage freq is 18). A technique called FSM produces dramatic improvements in treatment outcomes of macular degeneration. It is "frequency specific" because the frequencies of the tissue and that of the pathology are "matched". For example, hemorrhage in the macula the FSM treatment would use 18 Hz and 137 Hz (macula frequency). The coupled frequencies match the exact abnormalities present in the damaged tissue. The goal is to neutralize frequencies in disharmony. Instead of using basic generic frequencies which have a low level affect on the diseased eye tissue we now can use frequencies specific to the retinal tissue and the pathology.

Current is delivered by electro-conductive pads, acupuncture probes or by using sliver meshed gloves that are wrapped in a damp washcloth. The gloves are the preferred delivery system since this has demonstrated to deliver a consistent microcurrent energy into the eye.

BEMER Physical Vascular Technology

Revolutionary Medical Technology for the 21st Century

Janna Mintz

How can we improve the health of people over the age of 50 without side effects? Improving the health of an ageing population that suffers from deteriorating vascular health, cancer and the side effects of medication will have a far-reaching impact. It could reduce the use of medications, reduce medical care costs, and improve the quality of life of ageing populations.

Our circulatory system is a vast network that shuttles vital nutrients and oxygen to each of the 100 trillion cells in our bodies. The venous portion of this network removes cellular waste. Biophysics research has shown that the heart is not a strong enough pump to adequately circulate the blood through the vast network of arteries and veins, arterioles and venules, and capillaries.

Recent discoveries have shown that the smallest of arteries and veins, the arterioles and venules facilitate blood flow through their rhythmic pumping action known as vasomotion.

The BEMER is a noninvasive medical device that delivers a signal to the body through a pulsed EM field. The BEMER supports increased vasomotion, thus supporting microcirculation. Enhanced microcirculation positively affects bodily functions including physical performance, mental functioning, immune system, anti-aging, detoxification, stress, healing, regeneration, fitness, use of nutrients, pain, insomnia, hormones, and endorphins.

Revolutionary Cams Technology Scalar Technology for improved health and reverse aging

Charles Crosby DO, MD(H)

delivered via CAMS technology for a wide range of anti-aging benefits.

CAMS technology uses quartz technology to change light and electrical input to scalar output. When directed towards the human body with intention, it re-establishes the body's normal frequency patterns and balances the bio-energetic field. The reduction of inflammation can be monitored in real time using standard ultrasound scanning and other methods. The re-growth of telomeres can be verified using modern telomere testing.

The presentation reviews the science and the efficacy of CAMS technology for rapid, non-invasive resolution of a variety of symptoms. Case studies reveal unprecedented telomere re-growth and other indicators of anti-aging.

Magnets and the Torus Structure

Magnetism... coolest phenomenon on the planet. How magnets work have been a mystery for thousands of years. Is it magic? Is it some kind of special force? Or is it something mechanical?

Dannel Roberts

If you take two magnets and put them next to each other, they appear to pull themselves together. Then you can flip one over and then they appear to push themselves apart. Ever notice magnets are usually taught about with illustrations and lines of force? One force attracts and one force repels. What if that isn't how magnets really work? What if magnets push themselves together and push themselves apart? Is that possible? Not only is it possible, it can be demonstrated using models.

Dannel threw out the standard magnetic teaching of lines of forces and replaced them with a new theory of moving particles. It became mechanical which can be demonstrated with models. In this seminar Dannel will use large scale,

working models to show how magnets work with his theory.

Start with particles spinning in a circle, then add particles spinning at 90° angles, finally the torus structure appears. Then put two magnets or torus structures side by side, and it will be easy to see that magnets push themselves together and push themselves apart. If you understand how a boomerang works you understand this theory.

This can help in our quest to understand the universe. Magnets and the torus structure are part of the answer. Who knows, do magnets work on the solar scale? the galactic scale? the universal scale? Who knows, with the knowledge from this seminar, you may be the one to answer these questions.

Overunity Test on a Kromrey Generator, ZPE and Magnetism

Dr. Thorsten Ludwig

Raymond Kromrey, a French inventor worked on a theory that magnetism and gravitation have the same origin. This theory led him to a new electro motive principle that he put into practice in this magnetic generator. Kromrey also called the machine molecular generator. An introduction into this interesting theory will be given.

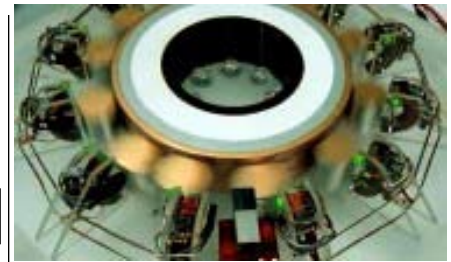

Kromrey filed a patent in 1964 and received US Patent 3,374,376 on March 19, 1968. The Kromrey generator is an electric generator that converts magnetic force into electric energy. Two segments of a rotor are moved through a magnetic field generated by a stator, either by permanent-magnetic or electromagnetic means.

This 1 kW Kromrey generator was given to the German space power association by a group from Geneva.

The generator was tested under different rotation frequencies and magnetic field strengths. Energy input and out put was measured using state of the art current and differential voltage probes together with Tektronix 3034 oscilloscope. Momentary voltage and current values were multiplied and integrated over time. The test results and the measurement method will be presented.

Dr Ludwig will also present how zero point energy sustains magnetism and how quantum fluctuations are part of the fundamental foundations of permanent magnets. The aim is to understand the principle of magnetic motor and generators better in order to raise the efficiency to overunity.

Free Energy, Magnetic Converters and Antigravity

Russell Anderson

Historically there have been claims and demonstrations of free energy systems that exhibit dynamic counterbary (antigravity) as a by-product of their operation. The vacuum, far from being empty, is a seething plenum of sub-microscopic white/black holes popping in and out of existence millions of times a second, channeling electric-flux in and out of our dimension of physical reality. The phenomenon of gravitation is due to a converging flux of "Ultra-mundane particles" or what used to be called over a century ago: *Lumineferous Ether*.

Nikola Tesla, who lit the world over a century ago, envisioned a giant cigar-shaped aircraft that would fly with no moving parts. Hubbard's apparatus powered a small boat around a bay which levitated occasionally during demonstrations. Later, TT Brown proved electricity and gravity were related with his patented apparatus, which I demonstrated publicly in Reno NV (June 2000). This technology is overunity because far less power goes into the devices than is output in physical work (movement and propulsion brought about by force-field effects).

Schauberger and John Searl both proved that free energy and antigravity were strongly coupled. Now, using Searl's technology, STI has completed working free energy prototypes that function and power devices with NO INPUT POWER, that the audience can walk up to and examine. This presentation features LIVE DEMONSTRATIONS of real equipment!

Modern High Power PEMF Therapy and Its Scientific Basis

Josh Silver

Benefits of Pulsed Electro-Magnetic Field (“PEMF”) therapy have been demonstrated through more than 2,000 University level double-blind medical studies done in many countries with many different PEMF therapy devices, both high and low power. Positive effects of PEMF therapy have been well established since the mid 1900’s.

Low power PEMF devices entered the market in the early 1900’s (Tesla & others). These were used for studies and experimentation in healing and cellular wellness. They were sold to both consumers and as medical devices to doctors. High power PEMF devices entered the market in about 1975. They focused on muscle, nerve, tendon, ligament and cartilage health, on reducing pain and on regeneration from damage and disease. Now, PEMF therapies are everywhere: Chiropractors, Physical Therapists, Professional Sports Teams –even in the Veterinary Medicine world. There are even Agricultural applications.

PEMF therapy is accepted around the world. The FDA accepted the use of PEMF devices to help heal non-union bone fractures in 1979, as well as urinary incontinence and muscle stimulation in 1992, and depression and anxiety in 2008. The European Union has many acceptances for the use of PEMF therapy in many areas including healing and recovery from trauma, degeneration and the treatment of the pain associated with these conditions.

Galvanic Skin Response (GSR) Hand Scanner

A cutting edge frequency body scan ...

Wil Spencer, VMSP

All forms of stress, regardless of the source, are communicated via glandular and electrical systems through the skin and the responses can be accurately read by *Galvanic Skin Response* technology. A new application of this seasoned technology will be presented as a means to help counter compromising effects upon genetic integrity from mineral deficiency, microbial imbalance and toxicity, coupled with negative emotional programming.

Everything in the body happens by frequency and everything stressing the body can be identified via frequency. Minerals make that possible, as they hold the frequencies of health. A broad spectrum of soil borne microbes act as the liaison between the minerals and the body, among their many other healthful benefits.

Issues of toxicity are managed by utilizing the frequency generated personal protocols for restoring balance in the body. Dr Wil’s ground breaking protocols consist of nature based supplementation as well as modalities addressing the emotional programming and fundamental dietary recommendations. In this manner a body heals itself according to nature’s design and restores genetic integrity.

This technology is available to anyone with access to a computer and Internet Explorer. Our program will mail you a cradle, for your use. You then download a software program to operate the device and schedule your scan with our technician. That is all there is to taking advantage of this technology!

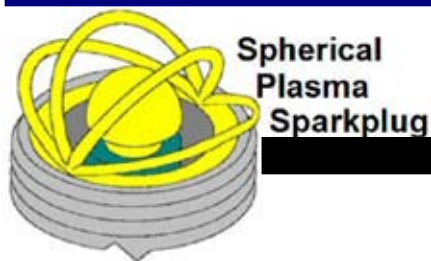

Tesla’s Humanitarian Wireless Technology Helps Relieve PTSD

Aeron Goldheart, CHt

to restore veterans’ mental, emotional and physical health in less time, effortlessly and free of charge. Tesla Energy Lights were installed as the core with a proven protocol “how to in-power one self” while recovering from PTSD (post traumatic stress disorder) and TBI (traumatic brain injuries). First hand reports on the process, as well as responses from the vets and doctors will be presented.

Aeron will also unveil the latest exclusive quartz crystal advancement in tube frequency technology using salt and water vapor - never before made nor applied anywhere else. They are predicated on Tesla’s knowledge of the relationship of the ionosphere (above) and aquifers (below) combined to produce his wireless towers.

**Spherical
Plasma
Sparkplug**

Ryushin Omasa discovered that vibrating blades in a water electrolyzer yield stable nano-bubbles of a powerful water cluster gas. Detailed studies by Peter Graneau and George Hathaway showed that an anomalous, excessive force is produced by abrupt electrical discharge into cool fog. David Faust observed that microscopic ball lightning could be activated in water mist sprayed onto a Kirlian photography plate when subjected to abrupt unipolar discharge. Combining the discoveries of these researchers offers a surprising simple means to use water as a medium to drive an internal combustion engine with energy ultimately sourced from the zero-point energy (ZPE).

Engineering Modern HHO Technology With Quantum Physics

Andrew Batty

Inspired by videos of Stan Meyer driving a dune buggy on 100% water, Andrew's search for mileage gains began with a homemade HHO booster cell. Later, Hydrogen Garage was launched online to help fellow researchers buy parts and receive education for better gas mileage and cleaner emissions. By 2008, Hydrogen Garage introduced the patented Bob Boyce sealed series of H₂O cell designs... the ones that most copy, plates, gaskets, plastic all bolted, sandwiched together. Boyce's 1981 patent was gag ordered, for he proved 100% to 120% over unity. He still owns the PTI rights to his patent.

A longtime Tesla researcher, quantum physicist and chemist, Bob Boyce engineers his devices with an ever expanding base of knowledge, Longitudinal energy is attracted into Bob's

Vibrating Water Electrolyzers

Moray King

Omasa's patents will be discussed in detail. Originally vibrating electrolysis electrodes, he later found neutral blades would suffice. Flexible blades were vibrated at 50-200 Hz in order to induce a maximal "snapping" displacement of the blade tip. Snapping action yields cavitation bubbles and reentrant jet formation described by Mark LeClair. Omasa reported transmutation, confirming LeClair's experiments. Omasa's protocol reliably produces an energetic water cluster gas that drives an internal combustion engine.

Excess energy manifests when fog water clusters are subjected to abrupt electric discharge. Combining the fog gas with the powerful spark plug drives the engine by a "fuel" that is essentially equivalent to a thundercloud.

HHO cells that creates a higher atomic level quality of HHO gas. Yull Brown found 36 different properties of HHO gas, split from WATER. Andrew will explain these different gas qualities and discuss PWM's that produce tall spiked square ON/OFF shocks to the water, that whacks the molecules into a 75%+ ortho state, rather than the typical 75%+ para state.

Learn to respect the hydrogen/oxygen gas. Almost colorless with no fumes or smell, it is explosive. Then apply what you learned in your own garage!

Stan Meyer Unveiled! Convert Water to Fuel

Max Miller

Stan Meyer ran his buggy on water in the 1990s. Using a number of unique circuits and machinery, he was able to make hydrogen from water with *no electrolyte*. He held over 50 patents, world wide. Most of these patents dealt with hydrogen from water and running a standard car engine on that hydrogen, made on demand. A controversial figure, Stan died a sudden, bizarre death on March 20, 1998. However, others are carrying forward Stan's visionary work today.

Stan Meyer made hydrogen and oxygen from plain tap water, using a unipolar pulse train applied to a transformer and bifilar wound inductor. The pulse train is from a signal generator from 0 to 10kHz, square wave with a gate. The gate is basically another signal imposed over the first, that shuts the first off for a set amount of time. Stan's gas processor and EPG, were utilized on his water car and are being reproduced at this time.

In this groundbreaking presentation, the basic electronics and how electrical resonance of the inductor and the cell will inhibit the amps and let voltage raise will be thoroughly discussed. As time allows, a number of additional key points will be discussed. Hardware will be available throughout the show for closer examination and discussion. Attendees will also be introduced to my forum which is dedicated to instructing the public about Stan Meyer and how to replicate Stan's work with his circuits and models.

Cold Fusion vs Thorium Competing Alternatives to Nuclear Power Plants

Michelle Murphy

Technologies such as cold fusion and thorium offer solutions to our nuclear waste and safety issues. New emerging technologies are needed to replace our power plants and electrical grid so we can meet our energy needs. Adoption of such alternatives may reduce our dependence on fossil fuels and other traditional sources of energy.

The aftermath of Fukushima will have impact the Japan as well as the rest of the world and for decades. Thorium reactor design avoids this problem. Furthermore, it can't be weaponized. As revolution takes place in the energy sector, thorium is gaining has a lot of mainstream support from people including Nobel winner Carlo Rubbia,

Cold fusion is now marketable and at least half a dozen businesses are interested in entering the marketplace. Bill Gates has been briefed on the Rossi E-Cat. The technology produces more heat and energy than provided with the input, using specific elements, and no radiation is released. Mainstream cold fusion may soon become a viable nuclear alternative. A major manufacturer, Lockheed Martin, recently announced their version would be available within ten years.

Cold fusion and thorium offer a solution to our waste and meltdown issues. Other technologies are emerging to decentralize our power industry, Perhaps power plants will not be needed at all in the future!

An Introduction to FREE Energy and Overunity Technology

William Alek

Ere many generations pass, our machinery will be driven by a power obtainable at any point of the universe.

Nikola Tesla

In 1848, German physicist Wilhelm Weber used a bifilar coil in his electro-dynamometer. By 1871, Daniel Cook incorporated it in his *Electro-Magnetic Battery*. At the turn of the 20th century, Nikola Tesla used them in high frequency power research and received a patent.

A bifilar coil is a coil with two closely spaced parallel windings. Bifilar coil configurations neutralize the effect of self-induction. This, in turn, reduces the overall impedance of the coil.

This lecture will examine how bifilar coil-based devices can produce overunity or free Energy. Classical Electromagnetism, Relativistic Mechanics and Quantum Mechanics interact to help form a complete model about how overunity energy is created.

A true pioneer of science, Nikola Tesla's anti-relativistic, non-Newtonian philosophical and scientific stances served as a basis for his achievements, the insights into the untenability of the Einstein's second postulate on the light velocity invariance and the real working mechanism of natural orbital systems are revealed.

The global thermal energy of a planet counteracts effects of the body-Sun mutual shadowing from surrounding 'space' energy. The two thermal components are in dynamic equilibrium, acting in opposite directions along the line connecting a planet and the Sun. As result, the only parameters involved

The wide ranging lecture includes a easy-to-understand Power-Point presentation covering Einstein's Special Theory of Relativity Theory, Quantum Tunneling thru Zero Time Space, Near Field/Reactive Power generation, Negative-to-Positive Energy transformation, circuit design and more.

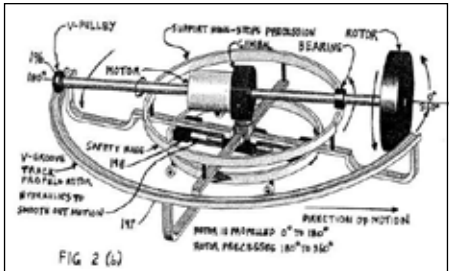

William will present products that utilize the advanced physics presented above called GoPowerUp. All these products are Self-Sustaining meaning they require NO traditional external source of energy such as from the 'grid' to operate. Fossil fuels, nuclear fission/fusion energy sources and renewable energy sources (ie solar and wind) are obsolete with this technology. Demonstrations will be provided.

Thermal-Gravitational Oscillator and Tesla's Luminiferous Ether

Slobodan Nedić

are the gravitational constant (which Tesla thought should be different for different bodies) and the planets' specific temperature coefficients, without reliance on the masses of the two bodies. The planet's actual trajectory comes 'naturally' from application of a directly formulated closed path least-action principle expression, resulting in very large "over-unity" effects in the energy balance for various planets.

Applying this principle large-scale phenomena and extending it to the atomic and the nano-scale Casimir effect related over-unity systems level may furnish fundamental breakthroughs. Similarly, General Theory of Relativity will be eliminated as replacement of the Newtonian theory of Gravity.

US Patent 7,900,874 is an anti-gravity device based on inertial propulsion. It could power flying saucers that would have abilities now attributed to UFOs, as well as cars, amusement park rides, toys and satellites. Drastically up-scaled, it could possibly even be used to move comets and asteroids.

The device relies two independent processes not requiring a propellant and which produces an asynchronous reaction against any external form of matter in the Local Inertial Reference Frame and do not violate Newton's Laws in the Universal Reference Frame. The first process produces horizontal motion, relies on the earth's gravitational field as an external force, and has been successfully tested. The

A Patented Inertial Propulsion Device

Harvey Fiala

second process produces vertical motion and relies only on the aether. It has been successfully tested considering the effect of the earth's gravity. The embodiment employing gravitational field is man's first real and practical exploitation of a gravitational field on earth to accomplish motion in a direction perpendicular to the gravity field.

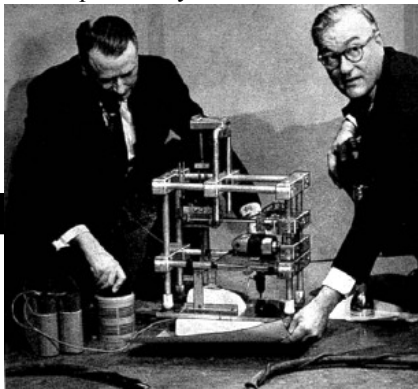

Conceivably, a car using inertial propulsion would have four wheels, but no engine or transmission or differential or gear trains leading to them. The wheels would be used strictly for holding the vehicle off the ground with the front wheels also used for steering. The use of inertial propulsion units will generate completely new industries and employment opportunities, and as soon as sustained acceleration is developed, travel to the stars will be a real possibility!

State Of The Art Inertial Propulsion Engineering

Michael Gamble

Norman Lomer Dean created a stir in the technical world when he claimed to have invented a reactionless drive able to generate a uni-directional force in free space, in violation of Newton's third law of motion from classical physics. This has led to an alternate method for force production, even in space, that can be solar-powered and electrically driven.

Ever since the Dean drive captured the public's imagination in the 1950s and 1960s researchers have struggled to replicate his claims. NASA has actively sought inertial propulsion devices capable replacing brute-force rockets and their highly explosive propellants. Far from being science fiction, small inertial propulsion devices are in use today. Leaders in the aerospace tech-

nology field have been using inertial propulsion of forced-precessed gyroscopes to move satellites around in orbit electrically, without firing up any rockets for years!

Mike Gamble, a longtime Boeing engineer, analyzed the Dean Drive style of inertial (mechanical) propulsion and its electromagnetic equivalence. While inertial propulsion is also known as reactionless thrusters, reactionless engines or bootstrap drives, Dean's drive in particular, received so much notoriety, that even today many refer to a reactionless drive as a Dean drive.

Vendor Showcase

Not all of the new and exciting technologies make it on stage. Often, some of the best technologies are out in the expo area. As a new feature, we are allowing the vendors an opportunity to give a 5-10 minute presentation on the products that they have brought to the conference. Since time is limited, this activity will be restricted to the vendors who are not speaking at the conference.

CONCURRENT CONFERENCE

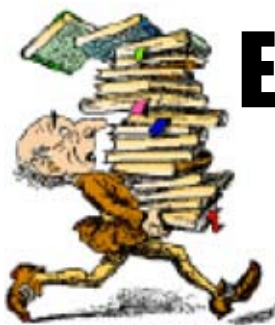

**Thursday-Saturday
Jul 30 — Aug 1**

Integrity Research Institute, sponsor of COFE7, is collaborating with the ExtraOrdinary Technology Conference and TeslaTech to present a three-day conference event with peer-reviewed published proceedings on July 30, 31, and August 1, 2015. COFE traditionally fulfills the mission statement of Integrity Research Institute to "research scientific integrity in the areas of energy, propulsion, and bioenergetics" so original papers on those vital topics are invited.

The COFE7 speaker schedule will be posted at the conference. A written proceedings of the conference will be available for purchase.

Attendees of the TeslaTech Conference will be able to attend the COFE7 lectures at no additional charge.

Particle Mechanics

The Theory of Energy States

— Dannell Roberts —

This book may contain the unifying theory of physics. What is the Unifying Theory? It is an idea that will show the relationship between all energies and matter. That's exactly what this book does, starting by classifying the basic characteristics of energy and matter.

By building on these ideas a new model of the atom will be introduced. This leads to new models of the elements. Then we will show new ways of chemical bonding. Many new molecules will be introduced. With these new ideas, you can look at an element or molecule and tell how it will act chemically. These ideas leads to heat and cold causes.

Next we discuss gravity, and you will be introduced to a completely new concept. Gravity will be far easier to understand than you can imagine. This theory will then bring in new concepts of sound, light, electricity and magnetism. All this is then tied together to give you a picture of how the universe really works. The simplicity of this theory will amaze you. (372pp)

Energy Machine of T. Henry Moray

Zero-Point Energy &
Pulsed Plasma Physics

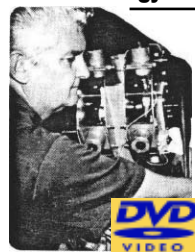

by **Moray B. King**

In the 1920s Moray invented a "free energy" device that produced 50 kW of electricity. Unexplainable by orthodox science, the electricity exhibited a strange "cold current" characteristic where thin wires could conduct appreciable power without heating. Moray suffered ruthless suppression. In 1939, the device was destroyed.

Today, modern physics recognizes *zero-point energy*. Other inventors discovered it is activated by pulsing plasma, and created novel energy devices, but they too were suppressed. The common pattern of these technologies clarified the fundamental operating principle. Free energy that works! An inspiration... a MUST have book (200pp)

450003-Energy Mach of Moray 14.95

Electric Motor Secrets

by **Peter Lindemann**

Laying dormant within the modern electric motor is a deep, dark secret. For the last 176 years, that secret has held the electric motor to its present level of performance. But in 1975, a quantum leap in electric motor design was made by an American inventor named Bob Teal. Teal's Magnipulsion Engine produced COPs between 8 and 10. Using lab demonstrations, patents, diagrams, and private documents, Dr. Peter Lindemann takes you on an extraordinary trip through the history of electric motors, resurrecting the secret of Magnipulsion, and revealing the future of efficient electric motor design. MUST HAVE DVD! (2hr 26 minutes)

Basic Electricity

**US Bureau of Naval
Personnel**

Originally a training course, its the best non-technical coverage on electricity. Topics include batteries, circuits, conductors, AC and DC, inductance and capacitance, generators, motors, transformers, amplifiers, etc. Many questions with answers.

390001- Basic Electricity 15.95

Basic Electronics

**US Bureau of Naval
Personnel**

This clear, well-illustrated introduction to electronic equipment covers the safe use of electronic

devices and basic test equipment, plus numerous essential topics: electron tubes, semiconductors, electronic power supplies, tuned circuits, an introduction to amplifiers, receivers, ranging and navigation systems, an introduction to computers, antennas, AM/FM, and much more. 560 illustrations.

390002- Basic Electronics 18.95

Tools and Their Uses

**US Bureau of Naval
Personnel**

Teaches names, general uses, and correct operation of all basic hand and power tools, fasteners, and measuring devices you are likely to need. Also, grinding, metal cutting, soldering and more.

390003-Tools and Their Uses...10.95

Aether Physics

Michael Twichell

Aether is the medium for the transmission of light, gravity and magnetism. This was the common consensus in the 1800's before the entire concept of the aether was derailed and replaced with the empty space model. But this story has a bad ending, since this empty space model has done nothing but to confuse and perplex even the best scientific minds for over 100 years.

Previously, I described how the flow of the aether and stretching of the aether creates gravity as matter absorbs the aether. In this presentation, other related topics especially magnetism, will be addressed, including:

- Vortices in aether create magnetism
- Fractal magnetism connects atoms, solar systems and galaxies
- The close relationship between gravity and magnetism
- Magnetic fabrics, layers of space and the Sub-Aether
- Proton magnet model
- Tiddlywink Effect and Spring Theory
- Aether's relationship to force
- Aether's relationship to electricity
- Aether's relationship to anti-gravity
- Magnetic message pathways
- The Biological Universe
- The concept of Sky Pilot
- Vibrating limestone to reduce its gravitational profile

Furthermore, the amazing clues given by the aether paradigm allows us to decipher the meaning of an ancient stone carving as seen on "Ancient Aliens" – a meaning which shows how to build an anti-gravity device!

Bringing the Ethers Home Practical Applications and Devices for Health, Agriculture, Water....and more!

John Rahart DDS

An entourage of pioneer thinkers and inventors working in the 'out of the box of the known', have brought forth theoretical, and observable results. Tesla, Reich, Keely, Spurling, Rife, Calahan, Schauburger, Hierononymus, Gurudas, Steiner, Caycee name but a few. John Milewski PhD focused his studies on Magnetricity/Superlight with a 'free energy' goal, while Rahart's background is medicine.

Together, concepts for the expanded applications integrated with the work of other pioneers, have resulted in new applications and devices developed for use in health, agriculture, water structuring, pollution control, and the list goes on. This work envelopes achieving a better understanding and utilization of the energies often de-

**Spurling unit
displayed on
Tri-Pyramidal
paramagnetic
tower design**

scribed as the 'Ethers'. We are working to transduce poorly understood Ether energies, and components operating at frequencies, and velocities faster than light and are predominantly magnetic in character, to bring them into a realm more familiar to us which is a speed of light or slower realm.

The stepping stones between these realms have been discovered. What now remains is to link and integrate these discoveries, expand and navigate the gaps between the Ethers and the world we find ourselves immersed in for the betterment of mankind.

ZPE: Quantum Threshold of Future Science

The day Science begins to study non-physical phenomena, it will make more progress in one decade than in all previous centuries of its existence...

Nikola Tesla

Suzanne Price

Just as Nikola Tesla's insistence on the concept of aether and his invention of alternating current opened the door of energy research to current ZPE and other applications, where will these cutting-edge technologies lead?

New forces will be discovered that demonstrate the reality of inter-dimensionality and explain many mysterious phenomena such as quantum entanglement. Future breakthroughs will occur in the field of quantum magnetism. Magnetic coherence via extremely cold temperatures, could create a new view of the universe through an inter-dimensional lens. Further investigations of magnetism and plasma will show

the mass of any object can be altered, challenging the standard viewpoint of gravity and the nature of mass.

Peering into the deep cosmos, Dark Matter and Dark Energy will be illuminated by the discovery of a third aspect - Dark Light - which also links spirituality and science.

Revelations from planetary history via archaeological discoveries and release of suppressed objects and deciphered texts will further show ancient peoples of the Earth possessed advanced knowledge of energy technology. Like Star Trek explorers, we will explore the quantum space where others have gone before long ago.

CONFERENCE DVD SETS AVAILABLE!!!

2015 ExtraOrdinary Technology Conference

Albuquerque, NM • July 29 - Aug 2, 2015

Conference Early PreRegistration Form

Register by April 30, 2015 for 25% Discount on Registration!

Information so HOT... it NEEDS to be Suppressed!

Nikola Tesla set the stage for unparalleled technological advances in the 20th Century and the new millennium. In the tradition of Tesla, many of our researchers will be presenting new concepts that go against the status quo. Speaking slots are limited with priority going to those who have WORKING HARDWARE! We challenge you to come and see many of these advanced concepts demonstrated at this conference.... *many of them are so unbelievable, you have to see them for yourself!!!*

This is a great opportunity to meet others who share your interests! Attending conferences is the best, and most economical, way of developing your network of professional contacts.... *Get the inside technical information you will not find on the internet!!!!* -

Suggested
Speaker
Topics/Categories :

- Tesla Technology
- Tesla Coils
- High Energy Physics
- Scalar Technology
- Alternative Energy
- Fuel Saving Products
- Alternative Medicine
- New Health Products
- Extreme Physics

Conference Notes:

• **Video Recordings.** Professional quality video DVDs will be available during and after the conference. *Private taping is not allowed.* Conference fees do not include DVDs.

• **Family Discounts.** Spouse rates available to immediate family accompanied by members.

• **Individual Sessions.** Individual session rates available at the door on a space available basis only.

• **Hotel. Embassy Suites...** includes free breakfast, free internet, and evening reception. This IS the best price/service combination possible and convenient..

Make your reservations early at TeslaTech's special group rate starting at \$94 per nite.

• **Refund Policy.** Exchange only.. no cash refunds. Service fee of \$25 on all refunds. Refund credit for goods/services offered by TeslaTech only.

Cancellations after Jul 14, 2015 & "No Shows" are non-refundable

Send in with check or money order in United States funds to:
