Wednesday Jul 26 -5PM

Brown's Gas (HHO) Health Applications

**Brown's Gas (HHO) has dozens
of extraordinary applications.**

George Wiseman

Brown's Gas (BG or HHO) has dozens of extraordinary applications. Once you have a BG generating machine in your home or business, there are many ways you can use it to save money and enhance your life. This presentation is based on REAL WORLD applications and results already achieved by people (and clinics) actually using BG to resolve health issues using this very special form of WATER.

Brown's Gas for Health is an emerging application that can be entirely made at home... from building the electrolyzer to the application of the gas. Dozens of practical BG applications will be highlighted before George specifically addresses using BG to increase the health of plants, animals and people. By actually achieving health instead of treating symptoms. BG is an excellent technology to help you take back control of your health from the Pharmaceutical Industry. This application is extraordinarily astounding, yet is being done by ordinary people in their own homes everyday!

Friday Jul 28 - 7PM

ExtraOrdinary Resonance Effects in Clinical Practice

Carolyn McMakin, MA, DC

The effects of specific frequencies delivered by square wave pulses and micro amperage current have been used and documented by Frequency Specific Microcurrent practitioners for decades. They have done things with the frequency protocols that I would never have thought possible 20 years ago when I started teaching this.

The documented effects include log rate reductions in all inflammatory cytokines by factors of 10 and 20 times within 90 minutes in human patients, and 62% reduction in lipoxigenase mediated inflammation in 4 minutes, 30% reduction in COX mediated inflammation in 4 minutes and other specific effects on immune system response produced in an animal model. Well documented case data suggests profound effects in regulation of the autonomic nervous system, PTSD, autism, brain injuries, liver disease, diabetic peripheral neuropathy, brown recluse spider bite, post operative recovery and pancreatitis. The results have been shown to be produced only by specific sequences of two channel frequency pairs. The proposed mechanism of these effects will be discussed.

Thursday Jul 27 - 7PM

"Exploring the Force" for Unlimited Power

**Introducing the "Magnevex"
Magnetic/Electric Vortex gear**

Michael Leas

Advanced research in Electro/Magnetic/Vortex fields will be presented from experiments resulting in the patent pending *Magnetic Spiral Bevel Gear #62/183,191*. Michael's research provides a new understanding of vortex energy dynamics. At a time when our energy sources questioned as to their ability to sustain the masses upon the world, researchers work to move beyond the old reactionary ways of fossil fuels and move into a new method of connecting our electrical systems to the *wheelwork of Nature* as once stated by Nikola Tesla. *Magnevex* functions using energy principles based on the writings of Norman, Tesla, and Russell which illustrate natural laws of the universe. In forming these new equations of 4-dimensional electromagnetic physics of cyclic motion instead of linear reaction, we can tap into a pulse, a wave, a cycle, as a regenerative movement of energy. This is where we will find a continuous cycle from this inexhaustible source, the infinite *Electric/Magnetic Vortex Field*.

Saturday Jul 30- 7PM

ORMUS/ORMES/ M-STATE Same Stuff... Different Names

John P Rahart DDS

Since ancient Egyptian times, alchemists have worked in secret to produce something called the Philosopher's Stone, or the Elixir of Life. Now, researchers have discovered materials believed to be related to the Philosopher's Stone. They were described as monoatomic elements in a high-spin state. Initially they were called **Orbitally Rearranged Monoatomic Elements (ORMEs)**. Other references include ORMES, monoatomic gold, white gold, white powder gold, ORMUS, m-state, AuM, microclusters, and manna.

As information on ORMUS accumulates, a mosaic of information across diverse disciplines emerges. An apparent 5th state of matter, whose qualities bridge the dimensions seem to come into play. Understanding, and integrating these qualities open doors to multidisciplinary realms. The quantum behavior and properties of these materials reveal previously unsuspected relationships in the material world between physical matter, living beings, and consciousness. Applications in biology, physics, medicine, health, and agriculture are being explored, expanded, and documented.
