Future of Vibrational Medicine

Wil Spencer, VMScP, DPSc

In today's complex industrial world we have severe malnutrition, an extremely toxic environment contaminated by petrol chemicals, pesticides, pharmaceutical drug residue, genetically modified organisms and proteins (GMOs) and un-natural living conditions. Wil's vision is to restore our home, our planet and our lives to a workable and balanced state of health.

With the use of new, German made, modified Tesla Coil technology we are now able to see human bodies, animal bodies, soil, water and more with a view into the frequency or energetic realm, which exists all around us, like water to a fish. Gaining this new view of life is paramount to the advantages of helping the body survive in our current environmental state of disarray.

Advances in technology incorporating this technology, has made it possible for computers to communicate directly with the body to determine the various stressors affecting it. These computers also have the ability to create individualized protocols to help the body heal and thrive. Feeding the body appropriately increases the body's *Life Force*, brings its chelation system back online and repair/enhance its electrical system!

Healing the Human EM Body

Dr Kathleen Rosenblatt

Pulsed electromagnetic field (PEMF) therapy has been used to treat almost every human illness or malady, including many inflammatory diseases such as arthritis or psoriasis. It consists of a painless pulsing action most commonly been used in healing soft-tissue wounds and suppressing inflammatory responses at the cell membrane level to alleviate pain and increase range of motion in muscles and joints.

PEMF therapy up-regulates the body's functions and optimizes the body's ability to heal itself. Each magnetic pulse induces a tiny electrical signal that stimulates cellular repair. It improves the permeability of the cell to take in nutrients and expel toxins by clearing up the cell membrane---the brain of the cell. This outer layer gets clogged with sugars and proteins and becomes "carmelized." The stimulator clears the pores of the membrane and reactivates or rejuvenates the cell.

PEMF therapy improves the trans-membrane potential of cancerous cells, helping them to activate aerobic metabolism (oxygen), which also reduces inflammation, improves blood flow, and enhances immune function--three actions critical for eradicating cancer!

Using Brown's Gas to Fight Diseases!

George Wiseman

Thousands of people are now healing most diseases simply, inexpensively and at home. Modern medicine is good at THREE things; Diagnosis, Surgery and Mitigating Symptoms of disease. Modern medicine rarely CURES disease. Cures are not profitable. By mitigating symptoms the patient feels better while the disease often remains. The MOST any Doctor (or

anyone) can do is give the body what it needs to heal... The body ALWAYS heals ITSELF!

We are ~ 62% hydrogen by atomic VOLUME, so hydrogen is, without question our most important NUTRIENT. Modern medicine is only now (in the last 5 years) starting to realize the importance of hydrogen, with hundreds of scientific studies that show AMAZING healing with ZERO negative side effects.

Almost everyone is chronically dehydrated; even if they drink lots of water (that'll be explained). Most diseases are either caused by and/or exacerbated by dehydration (as in *lack of hydrogen*). When dehydrated, the body shuts down it's regeneration system (so you scar and age). If dehydration is chronic, the body shuts down it's immune system (so you get sick).
