The Story Behind John Searl's ExtraOrdinary Flying Machine!

SEG Replication ...Past, Present & Future

John Roy Robert Searl

Born in England on May 2, 1932, John Searl experienced recurring childhood dreams that led him to design a revolutionary electrical generator fueled only by rotating magnets, and large discs that emulated the flight characteristics displayed by many UFOs.

It is said that the first Sunday of every month between 1968 and 1972, Searl demonstrated his generators and flying discs to the general public. Television cameramen and news reporters were supposedly present for the events, and Searl claims he also demonstrated his flying disc to US military personnel. Not surprisingly, opposition to a fuel-less device was fierce.

Multi-billion dollar industries, governments and mainstream scientists were quick to label John Searl a crackpot ... He was subjected to ridicule and torment, fell victim to arson and theft, was imprisoned and left destitute. His research and devices were destroyed. But, John Searl is still alive today, and continues his mission to prove himself by rebuilding his amazing generator.

Spend an evening with John Searl and learn the science and technology of the Searl Effect Generator (SEG). This is a unique opportunity to get real current information on today's effort to reconstruct the SEG from the inventor, John Searl himself!
