

Exotic Research Conference 2000!

The Problem of Increasing Human Energy... 100 Years

Conference Program

& Conference Tape Order Form

Holiday Inn • Mesa, Arizona • July 27-30, 2000

**Leading Edge
Technology...**

- Advanced ENERGY technology...
- Breakthroughs in Propulsion...
- 21st MEDICAL techniques...
- Amazing HEALTH Products...

We're the Best Kept Secret in Science!!!

Featured Speakers

Jeffery Hayes
Susan Gordon
Bruce Gerlator
Elinor Rigler-Thal Gibbs
Paul Pantone
Doug Konzen
Tyler Pauley
George Wiseman
Marc Seifer, PhD
Jone Schramm PhD
Terry Skrinjar
Lyn Kinny
Mark Bean
Larry Deavenport
Matt Schadeck
Bruce Perreault
Sonne Ward
Dan Davidson
Ralph Suddath
Warren York

A Special Invitation...

Hi, I'm, Steve Elswick, BSEE—the Publisher of the *Exotic Research Report* as well as the former editor of *ExtraOrdinary Science* magazine and a founder of the International Tesla Society. As a graduate of the *University of Colorado*, I was recognized as the *IEEE Region 5 Outstanding Student Member*. Later, I was recognized as the International Tesla Society's *1990*

Man of the Year.

In 1996, I left the Tesla Society to form Exotic Research. As we enter our fourth year, I am extending special invitation to those interested in pursuing Tesla's research, as well as 21st century science and technology in all fields including alternative medicine and alternative energy. **For a limited time you can get \$5 off a year's membership in Exotic Research.** In addition to a great magazine, you will receive discounts on our conference rates, as well as discounts on our mail order books.

I heartily encourage you to come to the Conference 2000. We have a great lineup of speakers **and hardware!** This is a great opportunity to meet the inventors and learn from them firsthand -- face-to-face --- about their discoveries and experiments! A lot of information is on the internet... but nothing can replace the opportunity to touch and see a working prototype... in some cases production models are available

Become a member
before August 1, 2000
for only \$25 (US only)!!!!
(\$30 Can/Mexico • \$50 Elsewhere)

Exotic Research Conference 2000!

The Problem of Increasing Human Energy... 100 Years

Holiday Inn • Mesa, Arizona • July 27-30, 2000

CONFERENCE PROGRAM OVERVIEW

Thursday • July 27

Session 1 - Tesla Tubine Technology

7:00PM: **Jeffery Hayes** - Tesla Turbines... 21st Century Powerhouses!

9:00PM: *Wine & Cheese*

Friday • July 28

Session 2 (Morning) • Alternative Medicine & Health

9:00AM: Susan Gordon - TREAGER: High Density Magnetic/Monochromatic Biofield Stimulator

10:00AM: Bruce Gelerter - Neuro Focus... For the New Millenium!

11:00AM: Elinor Rigler-Thal Gibbs - NeuroKinesthetics... Correcting Learning Disabilities

Session 3 (Afternoon) • Alternative Energy Technology

1:00PM: Paul Pantone - GEET Technology... Impossible! But it Works!

2:00PM: Doug Konzen - Konzen Electric Pulse Motor

3:00PM: Tyler Pauley - NITRO-9... Super Lubricant... Super Mileage!

4:00PM: **George Wiseman** - Water as A Fuel... The Myth and Reality! (90min)

Session 4 (Evening) --- Nikola Tesla

7:00PM: **Marc Seifer, PhD** - Breaking Free of the Constraints of Conventional Thinking

9:00PM: *Wine & Cheese*

Saturday • July 29

Session 5 (Morning) • Energy Medicine

9:00AM: **Jone Schramm PhD** - Electro-therapeutic Technologies and Applications

10:00AM: Terry Skrinjar - The Bio-Electric Field Enhancement Unit

11:00AM: Lyn Kinny - BioRay! 21st Century Healing...

Session 6 (Afternoon) • Tesla Technology

1:00PM: Mark Bean - Tesla Coils for Special Effects

2:00PM: **Larry Deavenport** - Replicating T. Townsend Brown's Experiments

3:00PM: **Matt Schadeck** - The Tesla Mechanical Oscillator

4:00PM: Bruce Perreault - Harnessing Tesla's Cosmic Rays (90min)

Session 7 (Evening) --- Tesla Technology

7:00PM: Sonne Ward - Replicating Tesla's Implosion Technology

9pm-???: *Wine & Cheese*

Sunday • July 30

Session 8 (Morning) • Exotic Technology Concepts

9:00AM: Dan Davidson - Shape Power Gravitational Resonance Effects

10:00AM: Ralph Suddath - Natural Falls Living Water System

11:00AM: **Warren York** - Tesla's Unified Field Theory... and Beyond!

Exotic Research Workshops • (charged separately)

Thursday • July 27

9:00AM: Sonne Ward - Cosmic Cooler Construction Workshop

1:00PM: George Wiseman - Brown's Gas Workshop

Sunday • July 30

1:00PM: **Paul Pantone** - Incredible World of GEET Technology Workshop

Exotic Research reserves the right to make changes to this schedule without notice.

Conference Facilities...

Holiday Inn Hotel & Suites

1600 South Country Club Drive • Mesa, AZ 85210

(480) 964-7000 • (480) 813-8649 Fax

For reservations with *low* conference rates, call **1-800-HOLIDAY** and specify the **EXOTIC RESEARCH** Conference...

Deadline: **June 23, 2000**

Amenities include:

- Outdoor Pool & Spa
- Michelle's Restaurant & Lounge
- Mini refrigerator & microwave in suites
- Hair dryer, coffee makers, irons and ironing boards in all rooms
- 5000 sq feet of flexible meeting & banquet space
- Data port telephones with voice mail
- Car rental agency on property
- Minutes from Sky Harbor Int'l Airport

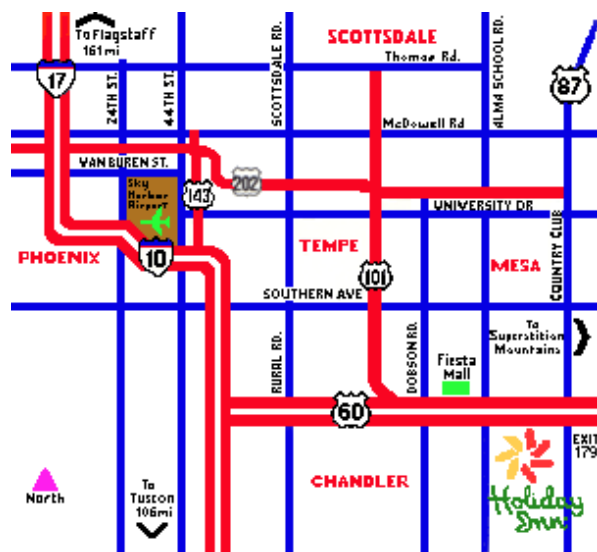

Conference Room Rates:

Double/King: \$63⁰⁰ • Deluxe Suites: \$83⁰⁰

Double/King: \$66⁰⁰ • Deluxe Suites: \$86⁰⁰ Conference rate after June 23.

This beautiful hotel has 248 rooms with 83 spacious two-room suites.

Location:

The *Holiday Inn Hotel & Suites* is located in the heart of the East Valley exit 179 on US60 and Country Club Drive.

The Holiday Inn Hotel and Suites is convenient to shopping malls, 20 nearby golf courses, a family fun water park and many other family attractions.

ADDITIONAL WORKSHOPS & ACTIVITIES

In addition to the lecture, additional untaped workshops by vendors and speakers will be held onsite at the conference! Some may be free, and others it is undetermined at this time. We will post times and locations of these "extras" in the Lobby during the conference, as well as announce them before each speaker when we announce other activities.

EXHIBITORS

This is a list of vendors (at the time of this printing) that will have displays at the conference. Feel free to contact them for more information on their topic if you miss them at the conference.

Bioray, Inc

SPEAKER CONTACT INFO WILL BE IN THE EXOTIC RESEARCH REPORT FOLLOWING THE CONFERENCE. WE WILL NOT GIVE THAT INFO ON THE PHONE.

Tesla Turbines... *The Next Generation!*

Jeffery A. Hayes

Suppose some one should discover a new mechanical principle--something as fundamental as James Watt's discovery of the expansive power of steam--by the use of which it became possible to build a motor that would give *ten horse power for every pound* of the engine's weight, a motor so implicitly simple in design that the veriest novice in mechanics could construct it and so elemental that it could not possibly get out of repair.

Then suppose that this motor could be run forward or backward at will, that it could be used as either an engine or a pump, that it cost almost nothing to build as compared with any other known form of engine, that it utilized a larger percentage of the available power than any existing machine, and, finally, that it would operate with gas, steam, compressed air or water, any one of them, as its driving power... or pump any fluid without shearing forces.

It does not take a mechanical expert to imagine the limitless possibilities of such an engine. It takes very little effort to conjure up a picture of a new world of industry and transportation made possible by the invention of such a device. "Revolutionary" seems a mild term to apply to it. That, however, is the word the inventor, Nikola Tesla, uses in describing it...

Information presented at this year's conference will explore many applications and current state-of-the-art developments of this motive force as a source of energy for the machines of the future. Here's an opportunity see one of these incredible engines, and observe that Tesla's claims are confirmed by the startling results!

Treager

High Density Magnetic/Monochromatic Biofield Stimula-

Susan Gordon • Researcher

The study of light on biological systems has demonstrated profound effects on circadian rhythms, mood, wound healing, vasodilation, hemoglobin, muscle tissue and bone. Specific frequencies of colored light cause different reactions in the body, particularly when applied through the eyes, or directly to the skin at the treatment site. Monochromatic red light in the 660 - 1000 nanometer range has the effect of causing hemoglobin to release an important gas known as Nitric Oxide.

Nitric Oxide is a relatively recent discovery of science (the 1998 Nobel Prize in Physiology or Medicine was awarded to R.F. Furchgott,

Louis J. Ignarro and F. Murad for their discoveries concerning nitric oxide), and it has been implicated as a signal molecule in a number of conditions including arthritis, osteoporosis, inflammation, ligament healing, memory, neuronal aging and regulation of blood pressure.

In experiments done on horses using a flexible pad containing thirty-six red light-emitting diodes and eighteen magnets it was found that each animal responded favorably to just three treatments each. Several demonstrated dramatic changes in the musculo-skeletal system, allowing previously lame horses to be returned to work.

NEURO FOCUS

FOR THE NEW MILLENIUM

Bruce Gelerter • Sound Therapy Researcher

Over the past few years, research of the brain's physiology has made great strides in understanding the mind. A two-tier approach now makes it possible dramatically enhance the quality of one's life.

The first tier uses a new technology capable of entraining brain waves to any desired state of mind. Advanced studies in the fields of microcurrent therapy, brain states as related to frequencies, sleep states, and hemisync therapy, among others made it possible. Learn how this exotic technology is used for stress reduction, athletic/ work performance enhancement, increased learning,

instant relaxation, and in areas of experimentation such as remote viewing, ESP, and out of body experiences.

The second tier resulted from the discovery of potent, and effective nutrients for optimal brain function and longevity. These nutrients help, you will be able to increase your memory capacity, increase your brain power, think sharper, have better focus and concentration, repair brain cells, detox your brain, etc.

Additional Nova Research conference workshops cover more tech specs, and demonstrate immediate effects of this exciting

Neuro-Kinesthetics...

Correcting Learning Disabilities

Elinor Rigler-Thal Gibbs, MS

An infant first learns to use the muscles of the forehead, the muscles surrounding the eye, and the muscles of the eyelid. These muscles, which assist the body in storing information, can be viewed as *mirrors to the mind!* Learning and developmental disabilities are created when these muscles do not function correctly. Additionally, these particular muscles also affect postural awareness and may distort perceptual information.

This is a unique opportunity for you to learn how to observe these muscles yourself. Close observation of the awareness/ perceptual muscles is essential in aiding early diagnosis and treatment using *NeuroKinesthetics* -- a regimen of treatment that focuses on the proper functioning of muscle spindles and their feedback system which is the body's secondary (or backup) nervous system.

There is hope for what would normally be considered hopeless cases. Now a troubled person can:

- Achieve greater dynamics for generating an improved learning equilibrium
- Increase the awareness tracking of his/her posture

These sensory processes are gained through *NeuroKinesthetics*. In addition to the lecture, untaped workshops on *NeuroKinesthetics* will be held onsite at the conference!

GEET Technology

Impossible! ... But it Works!

A New Frontier in Plasma Physics & Alternative Energy
featuring a live demonstration of the GEET Fuel Processor!!!

Paul Pantone

In simple definition, the GEET Fuel Processor could be called a new type of carburetor with a miniature refinery built in. With it, there is no need for catalytic converters, smog pumps and many other costly items on cars, as the GEET Fuel Processor eliminates pollution! Mileage is greatly increased if you truly consume ALL of the energy available in any fuel you may be using.

The working prototype of the GEET Fuel Processor was developed long before any technical analysis was attempted. It is a *self-inducing plasma generator*. Plasma research, a fairly new field, is ongoing and the laws governing this technology are yet to be written. Within the GEET Fuel Processor, the plasma is created on demand.

During this presentation, Paul will be covering the basic theory behind the GEET Fuel Processor. You will learn what works and what doesn't. He will demonstrate a GEET Fuel Processor in action. Most important of all, is that you will have an opportunity to ask the inventor himself, specific questions about his device! This advanced technology is available TODAY... and conversion kits will be available at the conference.

Super Lubricant... Super Mileage!

Tyler Pauley

Before you take your car to the repair shop, try **NITRO-9**. It can not repair your car if it is broken, but continued use of NITRO-9 will reduce and prevent mechanical failures and decrease maintenance trips to a repair center. For some, this has resulted in financial savings often equal to a whole year's supply of fuel.

NITRO-9 identifies a line of products that can extend the usable life of a piece of equipment two or three times. These super concentrated blends which offer advanced protection for your vehicle are:

- Fuel Supplement
- Automatic Transmission Power Blend
- Engine Oil Supplement

- Fuel Supplement

Champion products were developed under strict government control World War II and formulations for commercial use were made available shortly after the war. For more than 40 years, major oil companies became consistent consumers for these additive lubricants to extend their production equipment lifetimes.

Here is an opportunity to learn more about what may be the best kept secret in the industrial world! Even better, you will be able to this apply technology to extend the life of your vehicles and other home based equipment as these products will be available at the conference and the

KONZEN ELECTRIC PULSE MOTOR

Doug Konzen

HOW BIG IS THIS MOTOR?

The actual size is around a foot-square box, but in importance to the entire world and nearby planets, this motor design is bigger than the atom bomb. The over-unity motor produces energy forever; the bomb only explodes.

The new test motor takes in .63 watts DC and lights up two one watt AC light bulbs. That is all you need to know if you are wondering whether this motor puts out more watts than what takes to run it: Under a watt DC to run it; two watts AC output. This is only a primitive prototype-motor too. I can demonstrate the motor almost anytime to almost anybody.

There are no big secrets to this motor. Nothing about it violates Lenz's basic magnetic laws; these laws do not apply in this unique motor design because there are no permanent magnets or magnetic structures in the design for one thing, and the other is that power is created from matching electromagnetic fields that collide either N against N or S against S. *This motor is only coils against coils!*

There is nothing published in the textbooks about this sort of colliding electromagnetic energy anywhere, (check for yourself). This is original cutting edge research on a new phenomena... an irresistible challenge for the free energy researcher!

Friday • Session 4 (Afternoon)

Water as A Fuel...

The Myth and Reality!

George Wiseman

The idea of 'water for use as a fuel' has been around for quite some time. In fact, Jules Verne spelled it out in his novel, *The Mysterious Island*. Later in *The Problem of Increasing Human Energy*, Nikola Tesla proposed using it as a more efficient means to

...burn all kinds of refuse, cheap hydrocarbon, or coal of the most inferior quality which could not be burned in air or be otherwise utilized to advantage...

Attendees will receive a thorough briefing of "water as a fuel" technology. The "state of the art" efforts performed by various inventors as well as Eagle-Research's extraordinary gas production, electrolytic carburetors, and (of course) Brown's Gas will be discussed in detail at the conference!

George Wiseman has researched a number of various methodologies and specific technologies for utilizing water as a fuel --- some work, some don't. In addition to literature searches, interviews, and personal observations, George has performed numerous hands-on experiment. He is convinced that only a little more work needs to be done to make several different methods practical.

Currently, 'water as fuel' should be used for fuel enhancement and partial replacement. Ongoing research and development for water (usually split into hydrogen and oxygen for burning) to replace fossil-based fuels should be continued. It will make an excellent eco-fuel.

Friday • July 28 • Session 4 (Eve) • Tesla

Breaking Free

of the Constraints
of
Conventional Belief

Marc Seifer, PhD

As a young man, Nikola Tesla talked often of the possibility of interplanetary communication. Influenced by Buddhist philosophy and the thinking of Ernst Mach, Tesla began to develop a cosmology to get at the heart of what life was and simultaneously discover electricity's role in the process. He believed in the concept of an all-pervasive aether and also believed that machines could be developed that would have the capability of thinking for themselves.

The Problem of Increasing Human Energy, published 100 years ago spelled out Tesla's vision for mankind's future. JP Morgan's saw the article, and financed Tesla's biggest dream... and most devastating disappointment.. Wardencllyffe! The tower Tesla designed, was to power the world and light the oceans... However, powerful economic roadblocks stood in the way that drove Tesla deep into bankruptcy and culminated in the mindless destruction of the tower at Wardencllyffe.

Tesla's life changed dramatically after Wardencllyffe. Initially focused on developing his bladeless turbine; but his thoughts turned towards the revival of Wardencllyffe and his beloved Magnifying Transmitter. In 1925, his ideas on the wireless transmission of power were very

briefly entertained by the Bureau of Standards, but were abruptly rejected out of hand... due to the ignorance of how Tesla's system worked.

As an elderly man, Tesla discussed controversial topics such as free energy, particle beam weapons, cosmic rays that travel faster than light speed, a new magnifying transmitter to harness cosmic rays, interplanetary communication and a claim that he could transmit energy at twice the speed of light. Identification of each separate invention became a confusing task for researchers as each of these ideas involve the transmission of energy to distant places and the "death ray" in its final form, comprised features from many of the other inventions above.

These exotic inventions interest and fuel the free energy researchers imagination. Tesla's claim of transmitting energy at twice the speed of light brought Tesla in direct conflict with Einstein's suggestion that space was curved. Tesla's unique views on the nature of radioactivity also placed him out of the mainstream scientific world. Simply delusional... or did

Electrotherapeu-

Technologies and Applications

Jone Schramm, PhD

In early 1892, Tesla was surprised to find d'Arsonval used Tesla oscillators to investigate the physiological effects of high frequency currents. Shortly later, the violet ray [shown above] utilized vacuum electrodes for applying rf (or Tesla currents, as they were referred to in the days of yore). Thus the stage was set for a new field of medicine which uses electrical energy to treat various medical conditions and diseases... *electrotherapeutics*.

Current use is very limited in scope by conventional medical practitioners for trauma-based conditions (stimulating bone fracture repair, pain relief, etc). FDA certified medical use has not yet been approved for the use of electrical energy directly against bacteria, viruses, mold, fungus, yeast, candida, or against diseases and conditions present today. Nevertheless, this technology is being used for self-treatment, as well as by alternative practitioners. Their research has demonstrated the broad spectrum benefits and cures conditions that were previously treated predominantly with pharmaceutical therapies. Dr. Schramm will discuss and demonstrate several electrotherapeutic devices (primarily Rife type), protocols and adjunct therapies used with her research subjects over the last 5 years. .

THE BIO-ELECTRIC FIELD ENHANCEMENT UNIT

Terry Skrinjar

The Bioelectric Field Enhancer (BEFE) is the latest home based therapy for pain management and rapid healing. The self-contained unit is used in an ordinary bathtub. Fantastic results have been noted when used in the treatment of arthritic aches and pains, burns, scalds, incontinence, muscular injuries, menstrual problems, headaches and tooth aches. It also aids in reducing swelling of any kind and leaves the skin soft and supple.

One of the unit's most visual effects during its use is the release of toxins and foreign material trapped in the dermal layers (skin} of the user. This becomes very noticeable

by the level of discoloration of the water that appears during the bath. Even if you use a healthy diet or have chosen another therapy, this system will still be beneficial.

The BEFE unit uses magnetic technology to produce the Bio-Charge... the organic electricity your body produces in order to operate daily. A low charge equals low energy; so your whole body becomes sluggish and lethargic in all its functions. Physical symptoms from being tired and stressed manifest themselves as aches, pains or illness. By giving the body a Bio-Charge boost, some symptoms are alleviated and your system restored to its full function.

BioRay!

21st Century Healing...

Lyn Kinney

Based on technology developed by R. R. Rife using his Universal Microscope

Dr. Royal Raymond Rife, pioneer cancer researcher, began his research in 1920. Rife's Universal Microscope provided magnification up to 60,000 times without killing the specimen!!! This enabled him to observe live viruses and their reaction to certain stimuli.

Rife's work was documented and published by numerous prestigious and competent organizations including the Smithsonian Institution and Science magazine. However, Rife's work attracted the ire, wrath and full undivided attention of the American Medical Association (AMA) and pharmaceutical

companies when it was clear how successful his work was. The end result was that Rife ended up as a broken man and his equipment quietly — but forcibly — removed from all doctor offices.

The Bioray Light & Sound Generator, based on Rife's work, was developed and extensively tested. Validation of the unit's effectiveness in a variety of treatment protocols was a major goal. Animal and in vitro studies in the US, and foreign human studies, show consistent results for everyone using the BioRay. Now your can own a machine for your private

TESLA COILS AND SPECIAL EFFECTS

Mark Bean

In the early 1890s, Tesla entertained the scientist and general public alike with his demonstrations of high frequency, high voltage experiments. This type of electricity was virtually unheard of, indeed, even unimaginable, before Tesla developed the Tesla coil and demonstrated it before the IEE at an 1891 lecture in London, England.

By the end of the century, Tesla's huge coils were that enabled him to appear fearless as in one famous photo where he is sitting calmly by his 12-million volt coil in Colorado Springs... actually this is a double exposure (a technique Tesla used extensively in his research). Such feats have led to the general public's view that Tesla coils were just "toys" for entertainment purposes only.

Hollywood does little to dispel that image with the extensive use of Tesla coils in special effects as seen in *Terminator* and *Frankenstein*. (The actors really did have electricity flowing over their bodies.) Furthermore, plasma globes, powered by Tesla coils retain their popularity as toys or aesthetic decorations.

For more serious uses, the Tesla coil is the best way to provide high voltage anywhere it is needed. It is significantly more efficient and less expensive than a regular iron-core transformer. An added bonus: it is relatively safe... little output current.

Tesla coils are used extensively in the communication industry. Radio is impossible without them (or a derivative). Even the transportation field finds the Tesla coil useful. For instance, a scaled down version (ignition coil) is utilized in automobile engines to cause the spark in each spark plug. The terminating capacitance has been removed and the output connected to a timing circuit.

Now, the Tesla coil is preparing the way for the propulsion system of the 21st century! T. Townsend Brown's anti-gravity work requires the high voltage the Tesla coil delivers. Mark has reproduced his devices in my lab. His efforts to provide solid verifiable information based on reproducible experiments has led Mark to make many improvements to T.T. Brown's devices.

In the process, Mark Bean discov-

Replicating T. Townsend Brown's Experiments

Larry Deavenport

In the middle of the 1920's, T. Townsend Brown and Paul Biefield discovered what has become known as the *Biefield-Brown Effect*. This phenomena is produced when a high voltage source is connected to a charged condenser at 50 KV, as the negative electrode passes through a dielectric medium to the positive electrode. This led to his now famous U.S. Patents #2,949,550 and #3,022,430 which are now used as a pattern for ion propulsion systems in satellites. Brown would later build large airfoils and test this new type of propulsion on a 50 foot course in the mid-1950's.

In February 1995, Larry Deavenport built and successfully replicated some of T. Townsend Brown's experiments based on his U.S. Patent #2,949,550. With just a few minor changes to Brown's origi-

nal electrokinetic apparatus, Larry was able to obtain speeds of about 6 feet per second using 1-5/8 inch diameter discs attached to a rotating device. This was performed using a power supply at 30 KV (Brown used a 50 KV power supply).

Larry will speak about his experiments with electrogravitics and shed some light on the theories behind electrogravitics... a new and expanding field of study. Larry and Mark Bean will give a workshop on the construction of an electrokinetic apparatus for those interested in learning about this field.

THE TESLA MECHANICAL OSCILLATOR

Tech Specs

Weight: 34 lbs.
Oscillations: Up to 1/2 Inch
Dimensions: 4.5"x4.5"x12.75"
Air Pressure: up to 135 PSI
Note: The higher the air pressure, the greater the oscillation amplitude.

Manufactured by:
Dimatt Industries

Matt Schadeck

mechanical device and 5 pounds of pressure. We make no claim to this statement but it does suggest the inherent power of harmonic mechanical oscillation.

Some suggested uses for the Tesla Oscillator include:

- Settling concrete air pockets
- Dropping colloids from solution
- Bulk material handling
- Experimental laboratory work
- Linear generators
- Physics class teaching aid

Once you see this device operate on your workbench, ideas for other applications will form in your mind. It is an exhilarating moment when

The Tesla Mechanical Oscillator is a mechanical device that produces and captures the inherent power of harmonic mechanical oscillation. This "self valving" engine was invented to be vertically operated with steam for the purpose of generating electricity.

The inventions were in their last stages of construction when the laboratory Tesla was using burned down. Later he developed the smaller harmonic mechanical oscil-

lators which is similar to the design of this device. It is said that Tesla made the smaller versions for the purpose of producing harmonic electrical impulses which is the field he really loved.

The *News Science Review*, New York, July 1895, page 113 discusses how Mr. Tesla almost shook his apartment building to the ground with a similar device attached to the superstructure of the building using oscillator harmonics. He stated that he could shake down the Empire State Building with a similar

Harnessing Tesla's Cosmic Rays

Nuclear Science has been incorrect since the advent of the Atomic chain reac-

Bruce Perreault

Many tests and experiments have been conducted over the years with radiant energy in remote areas free of houses, power lines, radio stations, and telephone lines. They confirm that the radiant energy power generator runs on it's own, once started by a source of negative electrostatic charge! In addition to being self-sustaining, it also promises to produce huge amounts of excess power. It has the potential to supply thousands of kilowatts of electrical power!

Tesla had invented a radiant energy device specifically to capture and verify that cosmic rays do exist...

and be harnessed. In a 1934 magazine article interview, he stated that he had tested it in Colorado Springs. Later, the flyswatter looking device attached to a condenser (another Tesla invention) received a patent in 1901. Tesla's discovery and verification of the existence of cosmic rays put him squarely at odds with the theory of relativity (which is now being questioned as to its validity).

Frustrated Tesla finally gave his opinion of modern scientists, circa 1934:

The scientists from Franklin to Morse were clear thinkers and did not produce erroneous theories. The scientists of today think deeply instead of clearly. One

must be sane to think clearly, but one can think deeply and be quite insane.

Today's scientists have substituted mathematics for experiments and they wander off through equation after equation and eventually build a structure which has no relation to reality.

The Radiant Energy Generator is not a perpetual motion device. It siphons electrons (electricity) from a number of sources and converts them into usable power. A major obstacle to developing the technology is that this field has not been understood or well researched. A complete disclosure will be made, as well as hands-on demonstrations... Your test equipment is invited too!

Replicating Tesla's Implosion Technology

Sonne Ward

Sonne observed ball lightning many years ago as it vaporized a Utah Power & Light meter on a house in Central Idaho. There was no apparent damage to any other component parts. Later, in his years of research on various electric motors systems for cars, he observed a unique phenomena — a collapsing electromagnetic field around the motor. Some have termed it implosion, or the cooling down or negative energy effect.

A few years ago, Sonne set out to find or build a machine that would duplicate this ball lightning effect. The component parts were simple and once available through Forney Arc Welding Co. in Fort Collins, Colorado, complete with carbon rods up to one-half inch in diameter.

Mr. Ward then set out to modify this system to produce pure, unrectified D.C. current, similar to all forms of lightning occurring in

nature. He was using two Optima 12-volt batteries as a power source. Plasma (manmade ball lightning) is produced when the energy field around the system is completely collapsed.

Using a high potential pure, unadulterated current, a star is created, (plasma), and implosion occurs. Sonne learned much about this phenomena by studying Tesla's notes and came up with the key part of the system, the make-break circuit. It was difficult, because of the high potentials involved. Although Tesla devised many schemes, no records show a workable circuit.

Because there is no frequency, no voltage, only current, only pure energy, or plasma, is produced, which appears to swallow or implode matter similar to quasars or black holes in space. Sonne's *Starship Home* incorporates his Implosion Machine for the heating of the water and disposing of the garbage. Bruce

Meland (*Electrifying Times*) has seen Sonne's Implosion Machine and witnessed a quarter disappear into a plasma ball or "black hole".

Proposals were submitted to the Department of Energy for funding to experiment with onsite nuclear waste disposal using this implosion technology. If the technology proves successful, it will be a quantum leap in nuclear waste clean up, allowing nuclear power a window for clean energy to charge electric cars.

Sonne is excited... about his Implosion machine (Tesla Technology) which literally makes metal, glass, and organic material disappear, plus neutralizes nuclear waste. This

Sunday Afternoon (4PM)• July 30• Wedding Ceremony

The honor of your presence is requested...

*to Unite Together in Holy Matrimony,
Ms. T. Michelle Stone to Mr. Steven B. Elswick*

at four o'clock in the afternoon

*Sunday, the thirtieth day of July in the Year of Our Lord Two Thousand
at the Holiday Inn Hotel & Suites, 1686 South Country Club Drive, Mesa, Arizona.*

Reception following the ceremony. exact on-site location will be announced at the ceremony.

Shape Power Gravitational Resonance Effects

Dan Davidson

Duplicating Joe Parr's Gravity Wheel Experiments

For several years, Dan Davidson followed Joe Parr's experiments with pyramid energy and later the Gravity Wheel experiment which obtained up to 300% weight loss in the operational component of the experiment. Intrigued, Dan, with Joe Parr's assistance, built a duplicate experiment (shown above). It took several months to get the Davidson version of the experiment to operate successfully.

During this presentation, Dan will describe the latest research findings of the resonant frequencies associated with anti-gravity effects related to the pyramid shape. The latest Gravity Wheel experiments, revealed the two frequencies which cause moving pyramid shapes to go into a hyperspatial state. The hyperspatial condition is a non-hertzian forcefield which is impervious to all known physical, electromagnetic, and nuclear radiation effects and forces. This forcefield condition forms the basis which could lead to the development of a hyperspatial interstellar space drive with tremendous over unity effects!

Natural Falls

Ralph Suddath

Water is "alive" when found in its natural state, unprocessed and uncontaminated by man. Nature gives water life through many forces, including solar energy, magnetic forces and vortexing that occurs via natural waterpathways. Water absorbs these energies and natural nutrients through processes.

Synthetic processing de-energizes water delivered to the tap. Bacteria and cancer-causing agents thrive and flourish in de-energized water. Allergies develop in reaction to this unnatural state of water. Fatal heart attacks and strokes are more common in areas where hard water has *not* been treated. However, salt-softened water may cause an

elevated sodium level—linked to a variety of other health problems, including high blood pressure.

Natural Falls Living Water System has been developed to offer a healthy alternative to regular tap water or well water. The *Natural Falls System* removes impurities without the use of salt softeners to produce naturally soft water. It is the only system that uses vortexing action, magnetic force AND electrical fields to restore tap water to its naturally energized state!

Tesla's Unified Field Theory... and Beyond!!!

Warren York

In *How the Electrician's Lamp of Aladdin May Construct New Worlds* (New York Times April 21, 1908), Tesla speaks of man's mastery of the physical universe by adopting certain theories. He states:

Every ponderable atom is differentiated from a tenuous fluid, filling all space merely by spinning motion, as a whirl of water in a calm lake. By being set in movement this fluid, the ether, becomes gross matter. Its movement arrested, the primary substance reverts to it's normal state.

The normal state here is one of "stillness" where radiation then goes

after it's time line as matter. Tesla further observes:

It appears, then, possible for man through harnessed energy of the medium and suitable agencies for starting and stopping ether whirls to cause matter to form and disappear. At his command, almost without effort on his part, old worlds would vanish and new ones would spring into being...

Once again, Nikola Tesla is ahead of his time. The field theory that Tesla needs to accomplish this is beyond that of current physics doctrine! It's time to examine the aether and its engineerability!

Cosmic Cooler

Construction Workshop

Sonne Ward

Sonne is very excited about his walk-in refrigerator—the Cosmic Cooler. Designed for food storage using Sacred Geometry, it replaces the conventional refrigerator... no freon, moving parts or electric bills! The chamber has a mean temperature of 50° F with humidity at 116%.

The Cosmic Cooler has proven to be a reliable source of refrigeration. Some of the foods stored were potatoes, carrots, onions, lettuce, grapes, banana's and various other produce. Meats have been tested also. In all cases the shelf life has increased.

Some cell tissues actually regenerate in the produce. In one case a Kamboucha mushroom was stored in a ziplock sandwich bag for over six months. Some Red Delicious apples have been stored for over a year. Lettuce has kept in a crisp condition for a month. Sonne's favorite, Idaho potatoes, can be kept well over a year. All this without CFC's or electric power.

The cosmic cooler's regenerative capability is truly amazing. Spoiled potatoes placed in the cooler have regained their color and texture. Sonne has developed a natural fruit spirit from the liquid generated in the Cosmic Cooler. He refers to it as *Love Potion #10* or *Organic Furfural* and it also has regenerative powers.

Brown's Gas...

CONSTRUCTION WORKSHOP

George Wiseman

To get a good handle on any device, it is generally a good idea to be able to observe it closely in action. We built a 'clear' series-cell Brown's Gas electrolyzer so we could see how Brown's Gas was actually formed. The ability to observe our Brown's Gas electrolyzer in action led us to an exciting new discovery!

In addition to oxygen gas and hydrogen gas being formed on their respective plates, we saw a third ASTONISHING thing. We can see (and we see it every time) a THIRD gas being formed exactly in the middle BETWEEN the plates... in the fluid itself. At this

point in time, we have come to the conclusion that **this THIRD GAS is actually Brown's Gas...** and that it is *water which absorbed enough actual electrical energy to become a gas...* not steam.

The flameless mon-atomic mixture allows unique welding capabilities with materials like glass, copper, aluminum, quartz, and cast iron. It cuts with laser-like precision. Brown's Gas does a wonderful job of fusing and pre-heating almost any material. Watch out though, it has characteristics that'll surprise you.

Here's a great chance to *learn how to build one of your own* (or buy one of George's) so you can start experimenting on your own!

Incredible World of GEET Technology

Paul Pantone

President, GEET Research

In simple definition, the GEET Fuel Processor could be called a new type of carburetor with a miniature refinery built in. With it, there is no need for catalytic converters, smog pumps and many other costly items.

At a smog certification station in California, this fuel system was demonstrated while being monitored and videotaped. While running a gasoline engine on crude oil, the final exhaust was actually cleaner than the air in the establishment—zero pollution. This does not defy physics, as the laws of physics for

this device are yet to be written.

Engineers and scientists are working frantically to learn how plasma works... the phenomenon which occurs within and around the GEET Fuel Processor. Most plasma generators are externally generated and sustained. Within the GEET Fuel Processor, the plasma is self-generated on demand.

During this presentation, Paul will be covering the basic theory behind the GEET Fuel Processor. You will learn what works and what doesn't. He will demonstrate a GEET Fuel Processor in action. Paul will be giving step-by-step hands-on construction details... anyone will be

Exotic Research Conference 2000!

The Problem of Increasing Human Energy... 100 Years

Holiday Inn • Mesa, Arizona • July 27-30, 2000

CONFERENCE SUPER SAVER PREREGISTRATION-

Nikola Tesla set the stage for unparalleled advances in science, technology and medicine in the 20th Century. In many ways, he has set it for the new millenium as well. In the tradition of Tesla, many Exotic Researchers are developing new concepts that go against the status quo... and many of them will be used early in the next century. We challenge you to come and see many of these advanced concepts in energy and medicine demonstrated at this upcoming conference.... *many of them are so unbelievable, you have to see them for yourself!!!*

We encourage you to send in your preregistration early and take advantage of the discounts

Conference Notes:

- **Videotapes.** Professional quality video tapes will be available during and after the conference. Private taping is not allowed. Conference fees do not include tapes.
- **Workshops.** There are 3-hour workshops on Thursday (July 27)/Sunday afternoon (July 30). Workshops are additional.
- **Family Discounts.** Spouse rates/student rates available to immediate family accompanied by members. Students must be able to prove age.
- **Individual Sessions.** Individual session rates will be available at the door on a space available basis only. Individual sessions will total at least \$280.00 if each session was purchased separately.
- **Hotel.** Special room rates are directly available from the Holiday Inn. Call 1-800-Holiday before

EXTREME SCIENCE!

Alternative technologies for energy, medicine, health, and physics are in constant danger of being overlooked or suppressed by what Nikola Tesla referred to as the “organized opposition” — a coalition of intellectual and economic forces.

Exotic Research champions and nurtures **advanced concepts and products** in science and technology. In addition, we provide independent inventors and researchers a credible platform to introduce new, advanced concepts, inventions and discoveries to the world through our publications and conferences. We make related materials available
