

# Subself Revealed In Four Dimensions

**Michael Meyers**

*Visual noise*, that double vision aspect of our parallax stereo view, seen both before and behind the focal plane, actually reveals an innate capability for viewing 4 dimensional imagery in temporal space. Found as patterns, who's very existence is a direct consequence of intersecting paths of light. Those photons join and/or intersect on a plane where they magically generate patterns that are eventually absorbed by the eyes and rejoined.

We humans have the inherent ability to perceive and discern cross-sectional patterns of light. Those of us who are blessed with stereo sight and the ability to hyperVue can visualize "temporal masks" and view them in hyperspace. A simple exercise revealed during the presentation, will illustrate the process your mind uses to reconcile the data your eyes absorbs including higher dimensional vistas. At present, higher dimensional vistas are overwhelmingly ignored as *visual noise*. At worst they are dismissed as dangerous, which has been vital for the survival of the hunter/gatherer. From our most ancient of primal ancestors we are conditioned by our physical 3D surroundings to ignore and even reject 4DX patterns. To be clear, those images are not imagined nor are they optical illusions. They exist in 4-dimensions and are visualized by stereo ocular entities in "temporal space" whether one chooses to acknowledge them or not...

# Mysteries of the Aether

**Antigravity Secrets of the Ancients!**

**Michael Twichell**

Rejecting the empty space paradigm as bunk, Mike travels back into time using the aether model to explore nuances of the ancient knowledge of the aether. Learn how the aether not only explains current day science, opens the door to an antigravity reality! This exploration of an age-old quest, transcends both space and time and brings us to our original paradigm, the aether!

In the midst of WWII, Hitler sent his scientists to India to research the ancient flying technology of the Vimanas. The legendary Nazi Bell is the culminate result of their frantic search. Based on the mercury vortex engine, many believe that Viktor Schauberger (the water wizard) may have been the driving factor...

However, Twichell's interpretation of the Kundalini Yoga leads him to believe that the design of the mercury vortex engine is hidden in its writings! Reading between the lines, This book on Kundalini Yoga was plump full of details on the mercury vortex design, much like many parts of the Bible can be interpreted from a modern physics viewpoint in a fairly literal sense. If you have ever read a book on the Chakras, you would have found that the overcomplexity of the descriptions is noteworthy, and the reason for this seemingly unnecessary complexity is that is in fact IS A DESIGN for an antigravity device!!!

# Visionary Engineering ... the Tesla Way

**Suzanne Price**

Tesla – Power the World, graphic courtesy of James Anshutz

Can anyone enhance their own innate abilities and intelligence to continue exploring the vision Nikola Tesla aspired to 100 years ago? Science suggests we all possess the potential to tap into our inner knowledge and super-consciousness. The question remains, how?

Tesla, one of the most celebrated 20th century geniuses, received brilliant insights that helped him design and construct numerous inventions that catapulted the world into the modern era. He had a natural ability to tap into the realm of 4D information. His extraordinary visions enabled

him to "see" an alternative future utilizing subtle energies and to completely imagine how inspired inventions operated before ever creating blueprints or devices.

It is possible to enhance one's ability to enter subtle information streams for creative solutions. First, it is necessary to understand the basics of how energy works in subtle and material realms including within human beings – the "wheelwork of Nature," as Tesla called it. Many inventors are able to do that. One can also learn to access the "consciousness information stream". Based on insights from the latest theories of energy and human awareness, we explore techniques to prepare one to tap into the super-conscious stream of collective intelligence to imagine new perspectives, invent or improve free energy devices, or solve perplexing engineering problems. Here, we will examine a variety of extraordinary techniques to explore one's own visionary genius.
